animation, Elatio of Germany has announced an innovative and creative concept for automobile interior design.

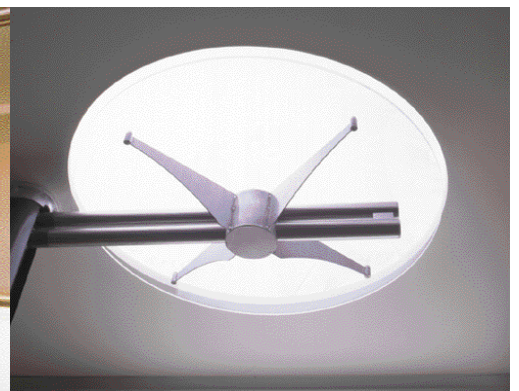

Although in terms of composition elements, weight, and static qualities, it does not appear to be any different from conventional design concepts, it provided a refreshing change with moving and lightweight fixtures. Elatio specified various possibilities for space utilization through ' Innovision ', which can serve the role of a moving office or house.

Electronic Book, introduced in 1998, is a portable device used for saving and displaying text and graphics on a built-in screen. ' Rocket Book ' by Nuvomedia, ' Millennium Reader ' by Librius, ' Softbook ' by Softbook Press are some of the E-Book products available. For its qualities such as the fast and simple process of transmitting content through the Internet, low cost, and easy reading of displays, the Electronic Book is expected to enjoy wide popularity among general users.

Although a mini laptop is smaller in PC size than laptop computers by 30%, in terms of function, it is a step behind laptop computers. Recently, however, mini-laptop computers with improved functions have been introduced in the market. ' VAIO ' by Sony is an integrated mini-laptop computer with built-in digital photography function. The camera is attached to the LCD (Liquid Crystal Display) with built-in toggle switch and uses the same Window 98 operating system as the regular laptop computer. ' VAIO ' is currently dominating the mini-laptop industry. ' Jornada 820 ' by Hewlett Packard, ' Phenom Express ' by LG, and ' Mobile Pro 800 ' by NEC are some of the other mini-laptop computers using the MS Window CE Environment. These companies, realizing the limitless growth possibilities of the mini-laptop, have committed substantial resources to the further development of mini-laptop capabilities.
