Internet Journey on Spaceship, 'Web st@tion: Yeca'

Managed by Han Softnet, a joint investment venture of Hangeul & Computer and Magicnet Information Communications, 'Yeca' became the icon of everyday 'space for internet culture.' Its headquarter internet room currently based in Apgujong-dong, seven other branch web stations are located through out the capital Seoul, each of them whose guest rooms extends up to 100m2 with about 100 PCs installed. Unlike the usual cyber cafes catering to teenagers who gather to play network computer games and e-mail checking, 'Yeca' aims to provide systematic information system for advanced internet activities such as cyber-stock exchange, internet chatting, and e-commerce. It also provide complete set of computer network and information system for SOHO businessmen. 'Yeca' owes its success in the cyber space service provider to its diversified contents, differentiated customer service, innovative concepts, and its design. www.haansoftnet.com
